SUMMARY

Computer Science Engineering student with hands-on experience in Full Stack Web Development, Machine Learning, and Artificial Intelligence. Skilled in developing scalable web applications using MERN Stack, Next.js, NestJS, ASP.NET Core, and SQL/NoSQL databases, along with building machine learning solutions using Python and Scikit-learn. Strong foundation in software development, REST APIs, database management, problem-solving, and modern development tools.

EXPERIENCE

Web Development Intern · TitansLab Infosoft

Nov 2024 – Nov 2025

- Worked on real-world full stack web applications using modern MERN technologies. Contributed to both frontend and backend development.
- Built responsive user interfaces and optimized APIs. Followed clean coding practices and performed efficient debugging. Collaborated with team members on live projects and assignments.

CERTIFICATIONS/ACHIEVEMENTS

Data Science & Artificial Intelligence Program – E&ICT Academy, IIT Roorkee in collaboration with Masai School

- Selected through national-level entrance examination by officially IIT Roorkee and Masai school. Pursuing advanced training in Python, Machine Learning, Data Science, AI concepts, and Industry Projects. (2026).

PROJECTS

Gayatri Jewellery E-Commerce Website (Client project) · MERN Stack

- Developed an Online jewellery shopping platform using MERN. Integrated JWT-based user authentication and authorization, dynamic cart, and secure payment. Designed a visually appealing UI with curated product collections.
- Delivered the solution as a real client project with production-ready functionality.

Minutes of Meeting (MOM) Management System · ASP.NET Core · MS-SQL Server

- Built a web-based MOM Management System to manage meetings, departments, staff, and attendance with a secure login system and dashboard analytics.
- Implemented User Authentication (Login/Registration) using SQL Server stored procedures with session-based authorization. Implemented Attendance module with single record management (add/edit/delete) and bulk “Fill Attendance” screen: tick multiple present users and save automatically.

Loan Default Prediction System (Machine Learning) · Python · Scikit-learn · Flask

- Created a machine learning web app using logistic regression to predict whether a customer will “default on a loan” based on financial, demographic, and loan-related attributes with exploratory data analysis (EDA).

TECHNICAL SKILLS

Languages: C, Python, Java, C#, JavaScript, TypeScript

Frontend: HTML/CSS, React, Next.js, Angular, Bootstrap, Tailwind CSS, ASP.NET

Backend & DB: Node.js, Express.js, NestJS, ASP.NET Core, MongoDB, MS-SQL, MySQL

Data & ML: Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit, Power BI, MS Excel

Tools: Git & GitHub, VS Code, Postman, Jupyter Notebook, Google Colab

EDUCATION

B.Tech — Computer Science & Engineering (Expected Jul 2027)
Darshan University, Rajkot · CGPA: 7.43 / 10.0

Diploma — Computer Engineering (Apr 2024)
Darshan University, Rajkot · CGPA: 8.94 / 10.0
