Career Objective

Versatile Computer Science student with skills in Artificial Intelligence (AI), Machine Learning (ML), and Full Stack Web Development. Passionate about building intelligent applications, scalable web systems, and data-driven solutions using modern technologies. Seeking opportunities to apply analytical thinking and problem-solving skills in real-world projects.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering
Darshan University | 2024 – 2027

Diploma – Computer Science & Engineering
Darshan University | 2021 – 2024
CGPA: 8.94

Internship Experience

Full Stack Web Development Intern (MERN / MEAN)
TitansLab Infosoft
Duration: 25 November 2024 – 23 November 2025

- Worked on real-world full stack web applications using modern MERN/MEAN technologies
- Contributed to both frontend and backend development
- Built responsive user interfaces and optimized APIs
- Followed clean coding practices and performed efficient debugging
- Collaborated with team members on live projects and assignments
- Quickly learned new technologies and applied them effectively in production-level work

---

Technical Skills

Programming Languages
C, Java, Python, JavaScript, TypeScript, PHP

Frontend Development
HTML, CSS, React, Next.js, Angular, Bootstrap, Tailwind CSS

Backend Development
Node.js, Express.js, NestJS, .NET Core

Databases
MongoDB, Microsoft SQL, PostgreSQL, MySQL

Artificial Intelligence & Machine Learning
Python, Pandas, NumPy, Data Preprocessing, Feature Engineering, Supervised Learning, Unsupervised Learning, CNN, YOLO

Tools & Platforms
Git, GitHub, VS Code, Postman, Jupyter Notebook, Google Colab

---

Key Projects

Road Pothole & Traffic Symbol Detection (AI / ML – Ongoing)

- Developed a deep learning-based object detection system using YOLO
- Performed dataset collection, annotation, and augmentation
- Trained model on GPU system and evaluated performance using precision, recall, and confidence metrics
- Focused on real-world road safety and smart transportation applications

---

Loan Default Prediction System (Machine Learning)

- Built a supervised machine learning classification model to predict loan default risk
- Applied data cleaning, encoding, scaling, and feature selection techniques
- Evaluated models using confusion matrix and F1-score

Gayatri Jewellery E-Commerce Website (MERN Stack) — Client Project

- Developed an online jewellery shopping platform using MERN
- Integrated user authentication, dynamic cart, and secure payment
- Designed a visually appealing UI with curated product collections
- Delivered the solution as a real client project with production-ready functionality

---

Dishly – Restaurant Management System (Full Stack) — Client Project

- Built a restaurant management system for orders, menu, billing, tables, and admin workflows
- Used Next.js frontend with Node.js / Express.js / MongoDB backend
- Implemented admin authentication, dynamic UI, and workflow automation

- Currently in development with core system modules completed

---

Frolic Backend

- Developed backend services using Node.js, Express.js, and MongoDB
- Implemented authentication, API routing, and database operations
- Designed scalable REST APIs for platform functionality

Academic / College Projects

Clinic Queue Management System – Frontend developed using **Next.js and Tailwind CSS**, integrated with backend APIs using Swagger documentation

Library Management System – Full stack application built using **Next.js and MongoDB** with CRUD operations and authentication

E-commerce Website – MERN/MEAN stack based online shopping platform with product catalog and order management

Helpdesk Ticket System – Backend API system built using **Node.js, Express.js, and MongoDB** for ticket tracking and issue management

---

Core Competencies

Full Stack Web Development
REST API Design & Integration
Machine Learning & Deep Learning Fundamentals
Problem Solving & Debugging

Professional Skills

Analytical Thinking
Quick Learner
Team Collaboration
Communication Skills
Time Management

Interests

Artificial Intelligence, Machine Learning, Web Development, Data Science, Gaming, Sports, Business & Startups.
